

ISPE FOUNDATION

Greatest Needs

The ISPE Foundation accelerates the availability of transformational medicines for all patient populations – fueling global health equity by fostering access to knowledge and nurturing diverse talent. By seizing opportunities to address the most pressing needs, the ISPE Foundation positively impacts global health equity now and in the future through the Greatest Needs Pillar.

Greatest Needs Pillar

Investments into our Greatest Needs Pillar also allow us to invest in our other three pillars effectively:

- **Scholarships and Grants:** Ensuring that students have financial resources to pursue their academic studies and that students and emerging leaders have access to ISPE's conferences and trainings
- **Workforce Diversity:** Provides an inclusive platform for sharing unique perspectives to improve interactions in the workplace
- **ISPE Knowledge without Borders:** Accelerating global knowledge transfer by making ISPE Guidance Documents and training resources available in emerging economies; increases global industry participation in the development and adoption of innovative technologies that advance the availability of transformational medicines to worldwide patient populations.

Addressing Today's Challenges, Preparing for Tomorrow's Opportunities

By supporting the ISPE Foundation's Greatest Needs Pillar, your gift will foster access to knowledge and nurture the diverse talent the pharmaceutical industry needs to tackle the challenges facing patients—today and in the future.

Your charitable donation to the Greatest Needs Pillar enables the ISPE Foundation to respond to emerging needs that will have the highest impact.

Together, we can make a difference in the lives of patients.

We are committed to fostering global health equity. This, in turn:

- Increases the focus on overlooked diseases
- Leads to the inclusion of more diverse patient populations in clinical trials, ensuring that the treatments work for a wide range of patients
- Builds patient trust in medical professionals and treatments
- Accelerates access to innovation globally
